

Nektar++ Future Topics

Mike Kirby
School of Computing
University of Utah

On the horizon ...

- Heterogeneous Architectures
 - Accelerator (GPUs / Intel Phi)
 - Hybrid Computing / co-Processing
- Basis Choices
 - Bernstein Polynomials (used in Graphics / CAD)
 - PolyFractinomials (solutions of fractional derivatives)

$$\frac{\partial^\mu}{dx^\mu}, \mu \in \mathbf{R}$$

On the horizon ...

- Optimizations
 - Further “Collections” (balance between encapsulation and group operations)
 - Memory Management
- Applications (Solvers)
 - Fractional PDEs
 - Vector Operations (Solid Mechanics / Electromagnetics)?
 - Boundary Element Solver

Thanks for listening!
